

LT22JE

Telescopic Boom Lifts-Electric

■ Safe and Reliable

- Standard dual channel sensor, safe and reliable;
- Electric emergency power systems provide more security;
- The protection level of components of the whole machine is above IP65, the protection level is high.

■ Intelligent and Efficient

- Composite action, intelligent and efficient;
- Electronic differential combined with suspending axle technology for better trafficability;
- The turntable rotates 360 ° continuously with small tail, which is suitable for narrow space operation;
- Four wheel strong AC electric drive, climbing capacity up to 40%, strong trafficability;
- High-power charger, large-capacity power battery, fast charging, ultra-long endurance;
- 2.4 m large working platform,300kg/454kg double load design, carrying more materials, Higher operation efficiency.

Energy Saving and Comfort

- Self -weight decrease through the booms, energy saving and stable;
- Automatic deceleration at the action limit position, stable action, small shaking;
- Optimize the electric control algorithm with the load sensitive hydraulic system to achieve accurate power output.

■ Green and Environmental Protection

- Pure electric power, low maintenance cost for users, high return on investment;
- Green and environmental protection, no emission, low noise, meet indoor and outdoor working conditions.

Standard Configuration

- ·Platform work lights
- ·Working strobe lamp
- ·Load sensing system
- ·Electro hydraulic proportional control
- ·Automatic brake system
- ·Tilt protection system
- ·Electric emergency descent system
- ·Emergency stop system
- ·Anti collision device
- ·Remote fault diagnosis system
- ·overload protection
- ·Full action warning

We reserve the right to change the plan and parameters without informing the users as Liugong products are constantly updated and improved.

The product configuration and appearance in the photo are different from the actual model which shoud be subject to the actual product.
